Professional profile

Passionate about technology and driven by a deep love for all things digital. Currently pursuing a degree in Computer Science. My journey has been marked by a strong desire to explore and understand the ever-evolving world of technology, and I'm eager to harness this enthusiasm to contribute to the field and create meaningful solutions.

Work experience

Pawvengers LTD, Dog Walker / Company Director

2021-Present, London, UK

Freelance, Web Developer

2016-Present, London, UK

- Developed and maintained websites for various companies, using libraries such as React and content management systems like WordPress.
- Managed email and user accounts, providing technical support and resolving server and hosting issues for clients.
- Designed and maintained user-centric web applications using React and related frameworks like Gatsby. Designed and developed interactive components, implemented business logic, and enhanced user experience.
- Actively participated in multiple software development teams serving organizations in the arts and language sectors, creating websites and executing marketing tasks.
- Designed and implemented security and surveillance systems using single-board computers like Raspberry Pi.

Sekkend, CMS Developer

2015-2016, London, UK

- Developed and designed websites from scratch for multiple companies using CMSs such as WordPress, Drupal, or Joomla. Responsible for implementing responsive design to ensure websites adapt seamlessly to various devices, always with a user-centric approach for commercial websites.
- Server maintenance and customer support. User email management.
- Conducted rebranding initiatives for companies with outdated designs, delivering fresh and modern visual identities.
